Summary

I am a versatile web developer with 4 years of experience in designing, developing, and releasing various SaaS applications. My expertise spans multiple JavaScript frameworks, including React Native and ReactJS, and I have strong proficiency in TypeScript. I excel at enhancing user experience through UI/UX design, leveraging tools like Figma to create intuitive interfaces. With a proven track record of leading mobile app projects from conception to completion, I have honed my self-management and problem-solving skills. Additionally, as an active contributor to web development communities, I stay current with industry trends and best practices to improve my craft continuously.

Languages & Frameworks & Softwares

- Languages - TypeScript, JavaScript, Kotlin, Java, Python, C#, Swift, SQL, PHP, HTML & CSS
- Frameworks - React Native, ReactJS, Angular, AngularJS, TailwindCSS and Bootstrap.
- Softwares - Github, Bitbucket, Jira, Fork, Asana, Visual Studio, VSCode, XCode, Android Studio

Education

B.S. Computer Science

Aug 2018 - Apr 2022

Southern Utah University, Cedar City, UT

- Cumulative GPA of 3.82
- Six-time Dean List Recipient

Related Experience

Software Engineer, HashiDev, LLC, Cedar City, Utah

Jan 2022 – May 2024

- Developed 2 SaaS React Native apps from scratch, increasing client customer interaction by over 15% and adding value that boosted client sales volume.
- Maintained and enhanced features for 8+ applications, ensuring high client satisfaction by keeping code and features up to date.
- Established myself as a leader and trusted team member, personally training 2 employees on our company tech stack, teaching them JavaScript, and pair-programming with them.
- Ensured a successful client acquisition by fixing last-minute security issues amid other tight deadlines, ensuring all projects were timely completed.
- When paging in multiple applications became messy and over-engineered, I developed a robust generic paging algorithm, simplifying the implementation of new paged lists for team members.
- Fostered clear communication with stakeholders, resulting in stakeholders feeling comfortable approaching/contacting me directly with questions or concerns.
- Tweaked UI/UX designs to enhance user experience, earning the trust of the head designer to make necessary adjustments.

Software Engineer Intern, HashiDev, LLC

Feb 2020 – Aug 2020 & May 2021 – Aug 2021

- Revamped an Angular site by adding new user permission settings and implementing accessible pages, enhancing site functionality.
- Identified and resolved long-standing bugs in Angular applications, earning a gift card from a satisfied client for fixing backlogged issues.
- Developed a new feature for a Real Estate client, allowing customers to manage their communities more effectively, significantly improving client satisfaction.
- Planned and managed tasks independently, ensuring clear and distinct deliverables, contributing to the successful completion of projects.

Project Manager, SUU Hope Corps, Cedar City, Utah

Sep 2021 – Mar 2022

- Led SUU Hope Corps, a grant-funded organization, providing free business consultation, web development, photography, graphic design, and marketing services. Managed 8 client projects, ensuring all businesses survived the COVID crisis.
- Collaborated closely with business owners to deliver tailored solutions, such as helping a brick-and-mortar board game shop launch an online site, significantly increasing their income.

E-commerce Specialist, SUU Hope Corps, Cedar City, Utah

Jul 2020 – Sep 2021

- Consulted with 12 small business owners, providing expertise in digitizing their businesses and maximizing their online presence, resulting in improved SEO and top 5 local rankings.
- Built and developed point-of-sale system-compatible websites, including a site for a restaurant that launched online ordering and significantly increased client sales.

Other Experience

Co-founder, Crypto Games LLC - Passive income business

Feb 2022 – Current

- Learned how to identify problems and create quality solutions, allowing me to establish a profitable passive income business with positive user feedback.
- Designed and developed Crypto Whales, a crypto-themed card game that simplifies cryptocurrency concepts, achieving high user engagement and positive feedback.
- Secured \$20,000 in funding from pitch competitions, enabling the game's development and launch.
- Managed the manufacturing of 1500 units, coordinating with suppliers and listing the product on multiple marketplaces, resulting in over \$5000 in sales to date.

React Projects

ReminderApp, <https://github.com/ShadReyes/ReminderApp>

- A React Native Expo Development Build app built to manage your daily TODOs or important events.

myPortfolio, <https://github.com/ShadReyes/myPortfolio>

- A ReactJS portfolio site built using Next.js framework and hosted on Cloudflare.
